

# SAILTRACKER iPhone App Setup - GerGTS Tracker

The iPhone app **GerGTS Tracker** version 2.20 is now available for use with **SailTracker**. The app can be found on the App Store by searching for "gtstracker". Configure the app by choosing the same options in the screenshots below, and enter your yacht's "VehicleID" (issued by Sailtracker.net).

**NOTE:** there is a bug in **GerGTS Tracker** caused by IOS7 which causes the app to send occasional bad data when minimized/running in the background. **Do not minimize the app** or erratic tracking could result – when ready to track, turn it on, connect to power and leave it alone if possible. A new app will be available on the app store shortly. If you do have to use the phone it's best to kill the app and re-start it.

**NOTE:** Install the full version – the "Free" version will not allow you to point the tracker app to the SailTracker website.

GerGTS is produced and managed by a third party and has no relationship with Sailtracker.net. If you have any questions or difficulties you can email: [info@sailtracker.net](mailto:info@sailtracker.net) or call 424.262.4725
